The smart alarm security system
that lets you check in when you're out

What could be more important than protecting your most important things?

Exactly,
NOTHING!

Which is why, our award-winning range of clever home security solutions are essential for providing the superior protection you want for your home and family. With a choice of security cameras, motion detectors, smoke detectors and home safety devices, Our Smart Alarm will revolutionise the way you live, keeping your world safe and sound every day.

Master Control Unit
State of the art voice assisted control unit. The heart and brains of the system and supports up to 32 wireless detection devices and incorporates communication devices as well as a back up battery.

Door/Window contact
Wireless Door/ Window Contact is a supervised transmitter ideal for wireless perimeter door/window protection in residential and small commercial applications.

PIR Detector
The iWAVE™ 15M PIR wireless detector is a stylish wall mounted passive infrared detector with Intelligent Digital Signal Processing available for homes, offices and small commercial installations.

Camera PIR
Wireless PIR Camera Detector is a PIR detector that includes an integrated camera for visual verification and is compatible with the security system. Upon an intrusion event, or by homeowner demand, the camera captures and transmits a sequence of images to the control panel that is then transmitted via GPRS or IP communication to a remote server.

Remote Keypad
Wireless full LCD display keypad with integrated smart key reader and on-board panic button. The keypad is easy to operate either using the keypad itself or using the smart key.

Smart key
also known as proximity tags. Allows easy setting/unsetting of your system. All smart keys have a unique identification so you can log who has set/unset the system.

Shock sensor
Shock Detector is a 24- hour perimeter protection detector intended for internal use. Using its ability to analyze vibrations it detects attempted break-ins whenever there is an attempt to force, smash, drill or saw through a protected window, door, wall or roof while the intruder is still outside.

External high power siren
• Fully battery powered
• Two-way wireless
• Fully supervised
• 105dBA piezo sound output, adjustable volume
• Alarm / Tamper Indication
• Low Battery Indication
• Sounder Self Testing
• Local sabotage alarm following entry delay time.

Smoke Detector
Wireless Smoke and Heat Detector combines two advanced technologies within a compact and streamlined design, the ideal choice for homeowners seeking the highest safety standards. The Smoke and Heat Detector offers a more sensitive and dependable product for early detection of fire hazards in different environments with a reduced risk of false alarms.

About us

We are accredited by the Security systems and alarms Inspectorate board.

The SSAIB is the independent body who inspect firms providing security systems across the UK. The SSAIB protects you, the customer, by insisting on the highest standards and operating the toughest inspection regime. We are inspected regularly by highly qualified, full-time inspectors, to prove our ongoing competence. SSAIB schemes meet or exceed the appropriate requirements of the Police, Fire Service and Insurers. Our accreditation by the SSAIB allows you to take advantage of our fantastic offer safe in the knowledge that you will be getting a high quality burglar alarm system and support service.

Our Staff

Our installers and surveyors are security screened so you can discuss your home security needs in confidence. Their training means they will be able to tailor your system to meet the needs of your family, property and budget. We have locally based installers, fully trained, meeting all industry standards ready to help you to protect what means most to you.
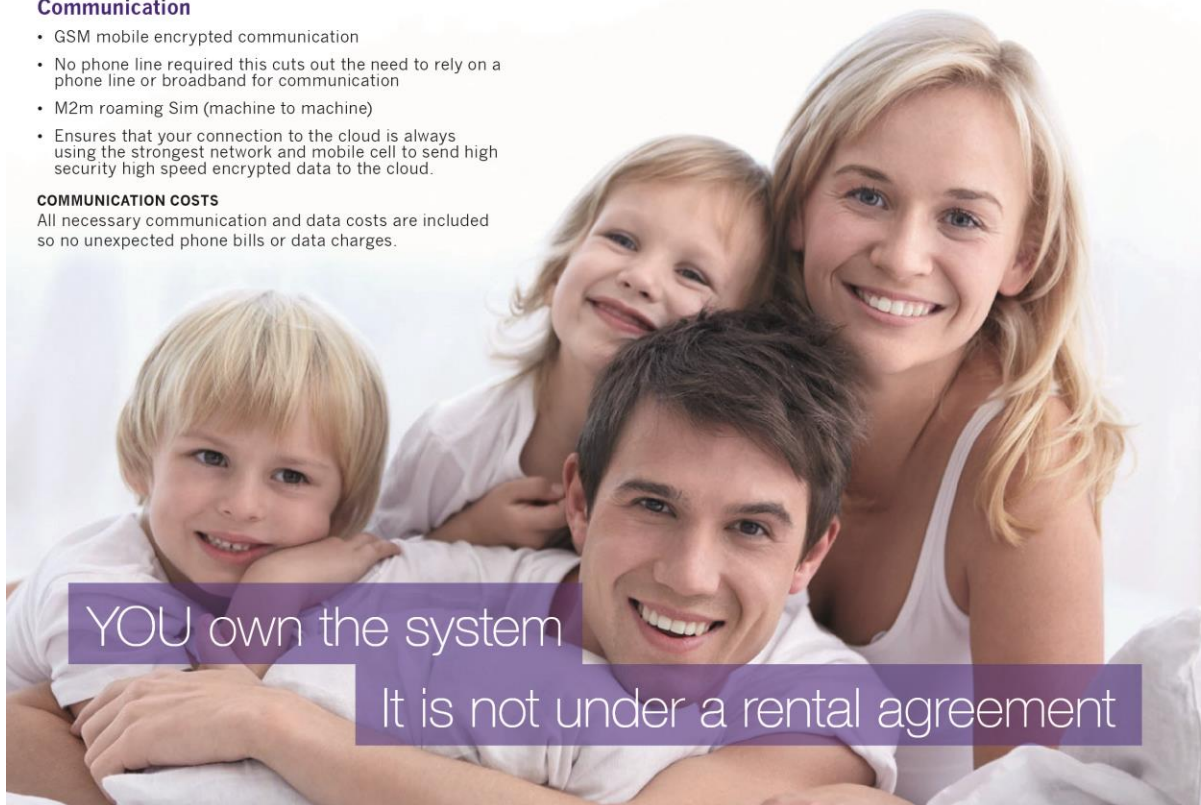

Wealth of experience

With over 30 years of experience protecting people and properties, we are sure to find the right solution for you and your family.
